Office Action Summary	Application No. 10/525,964	Applicant(s) TERADA ET AL.	
	Examiner PAUL DICKINSON	Art Unit 1618	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Applicant's arguments, filed 8/10/2009, have been fully considered but they are not deemed to be fully persuasive. Rejections and/or objections not reiterated from previous office actions are hereby withdrawn. The following rejections and/or objects are either reiterated or newly applied. They constitute the complete set presently being applied to the instant application.

Response to Arguments

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The rejection of claims 1, 12 and 16 under 35 U.S.C. 103(a) as being unpatentable over US 20020106461 ('461) in view of US 5759583 ('583) is maintained for the reasons of record.

Applicant argues that the claimed invention facilitates phagocytic activity of macrophages, so the finished products of the claimed remedies are specialized for a specific property. The sustained release drug delivery and sustained release matrices are completely different from facilitating phagocytic activity of macrophages.

Applicant's arguments have been fully considered but are not found persuasive. As stated previously, and reiterated here, the Examiner is interpreting the "remedy" of instant claim 1 to be a composition of matter and the phrase "whereby phagocytic

activity of macrophages being facilitated by the incorporation into macrophages and all or part of the pathogens present in the macrophages are exterminated to vanish" to be an intended use of the composition. The recitation of an intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In the present case, the particle formulation that is rendered obvious by '461 in view of '583 meets all the structural limitations of the instant claims for the reasons given in the previous office action. Accordingly, it is fully capable of performing the intended use.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).
